- Boasts of suite of innovative solutions for finance and accounting processes

##### Challenges/Opportunities

- More extensive monitoring of budgets
- Need for more efficient monitoring of its other business operations
- Enhance operational efficiency
- Lower cost
- Strengthen overall competitiveness.

##### Objectives

- Meet the demands of the company’s expansion program

##### Implementation Partner

- Clerysys Philippines, Inc.

##### Why SAP?

- Allows for integration of business processes

##### Benefits

- Faster report-generation
- More streamlined business operations
- Improve work efficiency
- Reduce operational costs

Theorem Global is finance and accounting partner to over 200 clients, providing accounting, tax, and business advisory services. It boasts of suite of innovative solutions for finance and accounting processes such – from Procure-to-Pay, Quote-to-Cash, Recording and Reporting, Business Intelligence and Analytics, Document Management System, Payroll, and Tax.

The Company began a restructuring program in 2008 that saw the creation of four quasi organizations. The new structure required more extensive monitoring of budgets and business performance of the various segments of the organization.

Theorem Global also embarked on an expansion program in the Asia-Pacific region with the opening of its Philippine branch, which led to a growing business portfolio of services. The Company's management saw a need to enhance operational efficiency, lower cost and strengthen overall competitiveness.

"There was a need for more timely and accurate reporting with Theorem Global's anticipated growth," said Marvin R. Galang, president of Theorem Global.

Theorem Global engaged Clerysys Philippines, Inc., a SAP partner, to deploy SAP Business One -- an integrated business management solution designed for small businesses.

"The system upgrade is also in line with our strategy of providing and fostering technological innovations to our clients," Galang added.

SAP Business One immediately allowed Theorem Global's staff to generate financial reports faster and more accurately. The

system's flexibility also meant that it could be linked to the Company's existing internal applications. This empowers Theorem Global's team to realize improved productivity of up to 65 percent as opposed to when it was running on the system prior to SAP Business One.

"With the implementation of SAP Business One, Theorem Global realizes ease and efficiency in its operations, and frees up its management team to focus on its growth in the Asia Pacific," said Jennifer Ligones, SAP Philippines Country Manager.

Furthermore, SAP Business One is linked to the Company's database. This allows Theorem Global to build applications such as payroll and document management link – indirectly maximizing efficiency and growth.

"This will put the Company in a better position to meet its objective of improving its client base by offering," Ligones also said.
