

## **DRUPAL ENDROSEMENT FOR FEDERAL RESERVE BANK BY CLERYSYS**

**Creation and implementation** of a new intranet website for the bank based on the Drupal 7 framework. Project was underway with internal web team but needed advanced expertise with Modules, Panels, Views, Themes and Security to help move forward the project to final stages of implementation.

Clerysys was involved in Drupal version 7 upgrade project for the bank:

### **Clerysys Responsibilities:**

- Involved in Creation, enhancement and Maintenance of websites built on the Drupal content management framework.
- Customization and development of Drupal Modules, Panels, Views and Themes with the help of project team.
- Participate in all aspects of website development: analysis, planning, testing, development, maintenance.
- Work closely with project team to develop their understanding of the Drupal framework which will enable them to be self-sufficient.
- Involvement in developing CUSTOM MODULE using Hooks for extending Drupal functionality; Setup the Drupal 7 Custom Content type.
- Design Custom THEME TEMPLATE from scratch for the BANK.
- Patch up on Contributed MODULE for extending Drupal functionality.
- Develop custom Modules using Drupal LDAP configuration enterprise level.
- Development of Drupal custom themes programmed many hooks. Develop test web site using DRUPAL Frame work before the final implementation
- Involved in training other programmers within the bank with respect to Drupal Architecture and work flow.

**Environment:** (PHP, MYSQL, JAVA SCRIPT, HTML, CSS, .NET , SQL SERVER, LINQ , C#, VISUAL BASIC, ASP.NET, MICROSOFT 2008 SERVER , SQL SERVER 2008, CMS SEVER)
